

Wetland Mapping and Classification Methodology

Overall Framework

A Method to Provide Baseline Mapping and Classification for Wetlands in Queensland

VERSION 1.2

Attachment 7b

Mapping Surrogates Queensland 3NM limit

Contents

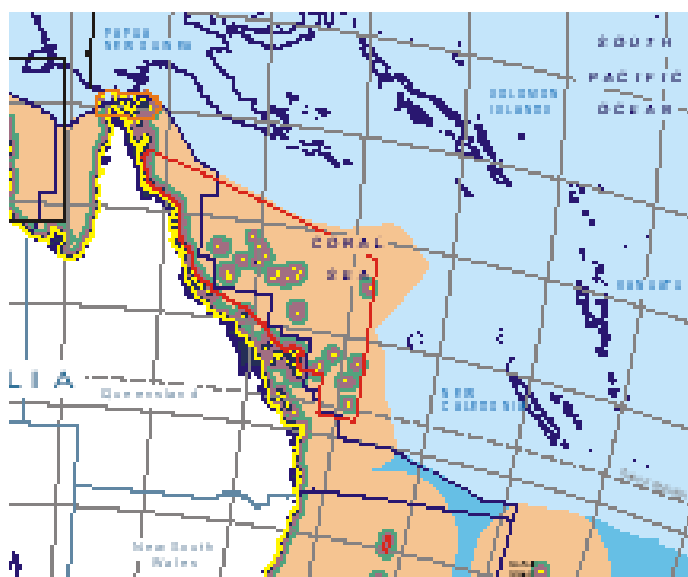

1. Purpose	2
2. The Principle	2
3. Reference	3

1. Purpose

To ensure that areas outside Queensland's jurisdiction are not included in the wetland mapping.

2. The Principle

The Australian Maritime Boundary Information System (AMBIS) 2001 Queensland 3NM limit has been used to identify the 3NM limit, illustrated by the green line in the illustration below.

For further technical information please refer to the Technical Specifications and Data Recording Standards (Decision Rule 11 in the main text of the Method).
